

Customer Success Story

Accellix- Automated benchtop Flow Cytometry for GMP Manufacturing focused on Cell Therapy

The Challenge

- Streamlined assay workflow minimizing user interaction
- Maximized reproducibility and accuracy
- Optical flow cell

“thinXXS has been a great partner in the development and continuous improvement of our cartridge. Their expertise in microfluidics and precision molding is a factor in the success of the Accellix Platform in cell therapy quality control”

Terrance Gin
Global VP of Operations,
Accellix Inc.

Our Solution

- Customized consumable design with
 - Wet reagent storage on card
 - Integrated mixing/pumping feature solved by 2-component-molding
 - Scalable and cost effective design
- Ultra-Precision tooling and molding
- Precision bonding with high reproducibility
- Inhouse blister manufacturing and assembly
